A BRIEF ACCOUNT OF THE RESETTLEMENT OPERATIONS.

The resettlement of Coimbatore district together with the taluk of Karūr (now transferred to the Trichinopoly district) involved the following five items of work :—

(1) Adangal revision.

(2) Resurvey.

(3) (a) Supplemental survey.

(b) Initial survey.

(4) Resettlement.

(5) Initial settlement.

1. *Adangal revision.*—As a preliminary to the re-survey and resettlement, M.R.Ry. Sambasiva Ayyar Avargal, Special Deputy Collector, started the adangal revision operations in January 1907 and continued to be in charge till January 1908 when Mr. Lancashire, who was appointed Special Settlement Officer for the resettlement of Coimbatore, relieved him. Thenceforward the work was under the supervision of the Special Settlement Officer or his assistants.

2. *Resurvey.*—Coimbatore, Avanashi, Palladam and a portion of Pollachi taluk (90,273 acres) were alone resurveyed. M.R.Ry. (now Dewan Bahadur) P. R. Narayana Ayyar Avargal, Deputy Director of Survey, was in charge of the resurvey operations. The resurvey work was started in April 1908 and closed in September 1912. The resurvey resulted in a slight decrease in area.

3. (a) *Supplemental survey.*—Neither resurvey nor revision survey was found necessary in the remaining taluks of Coimbatore district or in Karūr taluk. A supplemental survey of sub-divisions consequent on the revision of adangals by the Special Revenue staff was carried out by a special staff of Deputy Tahsildars, Land Records Inspectors, Remeasurement Inspectors and Surveyors under the immediate supervision of the Special Assistant Settlement Officer. This staff started work in March 1909 and finished in September 1912.

(b) *Initial survey.*—In Kollegal large blocks of waste land were split up into small fields of convenient size to facilitate assignment by the Revenue Department. Original traverse work was also done in connection with the above and also in surveying the lands that lay between the village boundaries (as surveyed in 1903) and the reserved forest.

4. *Resettlement.*—Two separate scheme reports were submitted one for Coimbatore, Avanashi (formed from Coimbatore and Palladam), Bhavani, Satyamangalam (present Gobichettipalaiyam plus the Talavadi villages transferred to Kollegal and since retransferred). Dhārāpuram and Palladam and Karur taluk in the beginning of 1909 and the other for Pollachi, Udamalpet and Kollegal in August 1911. The orders of the Board and Government are contained in Board's Proceedings No. 153, dated 24th April 1909, and Government Order No. 102, Revenue, dated 10th January 1910, for the first batch of taluks and Board's Proceedings No. 28, dated 11th January 1912, and Government Order No. 1972, Revenue, dated 3rd July 1912, for the second batch of taluks. The resettlement rates were introduced in Bhavani taluk in fasli 1319, in Coimbatore, Avanashi, Gobichettipalaiyam, Dhārāpuram, Palladam and Karūr (Trichinopoly district) in fasli 1320, in Erode in fasli 1321, and in Pollachi, Udamalpet and Kollegal in fasli 1322, with the exception of the villages of Talavadi firka then attached to Kollegal taluk, the settlement of which was completed in fasli 1321.

FEATURES OF RESETTLEMENT.

I. *Wet lands*—(*a*) *Classification of irrigation sources.*—No change was made in the classification of irrigation sources adopted at the original settlement except in the following cases:—

(1) The Odanthurai tank in Bhavani taluk was transferred to III class.

(2) The Kaniyampalaiyam anicut in Gobichettipalaiyam taluk was removed from the list of irrigation sources, its registered ayacut being classified as dry.

(3) The Chadivayelpallam channel irrigating the wet lands in the villages of Madhvarayapuram in the Coimbatore taluk was registered as a II class source.

(4) The Aliyar river and its channels in the Pollachi taluk and the Komaralingam channel, Udamalpet taluk, were registered as first class sources of irrigation in respect of such of the wet lands irrigated by them as may fairly be expected to receive a steady supply of water for second crop in all normal years.

(5) Natural rivers or streams in Pollachi and Coimbatore taluks were for the first time classified and placed in the III class in accordance with the orders contained in Government

Order No. 1971, dated 3rd July 1912, and the lands under them which were regularly growing wet crops were transferred to wet.

(6) For purposes of baling the Aliyar and the Amaravati were declared to be first class sources.

(b) *Classification of soils.*—The classification of soils at the original settlement in two main series, viz., regar and red ferruginous and the sub-division of each of these series into three classes, viz., clay, loam and sand were retained. The gradation of each of these sub-divisions into five sorts and the existing block system were also retained. Re-classification was resorted to only in exceptional cases such as transfers of lands from dry to wet made by the Revenue Department where the soil classification adopted did not properly represent the productive capacity of the land.

II. *Dry lands.*—No change was made in the grouping of dry lands adopted at the original settlement. An additional group III was introduced and applied to the enclosures in reserved forests.

(a) *Classification.*—No change was made in the classification of soils except in the following cases :—

(1) Lands left unclassified or registered as poramboke at the original settlement and since granted on patta and assessed by the Revenue Department.

(2) Lands transferred from wet to dry by the Revenue Department.

III. *Composition of second crop charge.*—No change was made in the rules for composition of second-crop charge except in the following cases :—

(a) The lands under the Cauvery korambu channels in Karūr taluk were classed as permanent double crop lands and composition discontinued.

(b) The wet lands of five villages irrigated by the Amaravati in Udamalpet taluk were registered as permanent double crop and charged one and a half times the first crop assessment. With regard to the wet lands in respect of which the channels under the Aliyar river in Pollachi taluk and the Komaralingam channel from the Amaravati in Udamalpet taluk were (as noted above) treated as first class sources, a special concessional rate of composition for second crop was adopted, limiting the enhancement on double crop land at this resettlement to 35 per cent. of the 2,900 acres affected by this change, less than 100 acres were paying a compounded assessment of higher than Rs. 7-8-0 before the resettlement. The usual rate of composition at one-third was

applied in the case of all second class wet lands under the Amaravati and Aliyar in lieu of the favourable rate of one-fourth of the first-crop charge hitherto allowed.

(c) The rates of composition of second-crop charge adopted at the original settlement deviated in some cases from the standard scale, and were followed during resettlement.

IV. *Differential water-rate system.*—This system was introduced in the first batch of taluks in fasli 1320 and in the second batch in fasli 1322.

The following are the rules observed in charging water-rate :—

Rule I. (a) *For a single wet crop.*—The difference between the dry and wet rates at which the land is assessed.

(b) *For a second or third wet crop.*—One-half of the charge shown against item (a) plus half the dry assessment.

(c) *For first, second or third dry crop.*—One-third of the charge shown against item (a).

(d) *For sugercane, betel, plantains and other wet crops which ordinarily remain on the ground for more than six months.*—The sum of the charges specified against items (a) and (b).

(e) *For dry crops which ordinarily remain on the ground for more than six months.*—One and a half times the charges shown against item (c).

Rule II.—When water used for irrigation cannot be obtained without raising it by baling or by some other mechanical contrivance, the water-rate charge should be three-fourths of the rate specified in rule I.

V. *Revision of ground rents.*—There are 19 towns in the Coimbatore district as now constituted and ground rents were revised in all of them under the orders of the Collector.

VI. *Forests.*—Forest section 16 notifications were checked and the correct registry was made in the settlement registers.

VII. *Introduction report.*—Mr. Lancashire submitted the report on the introduction of resettlement rates in the taluks of Coimbatore, Bhavani, Avanashi, Gobichettipalaiyam, Dhārāpuram and Palladam in the Coimbatore district and the Karūr taluk (Trichinopoly district) on the 1st March 1912 (Board's Proceedings No. 429, dated 24th August 1912) and M.R.Ry. J. Sundarayya Pantulu Garu that for Erode taluk on 23rd July 1913 (Board's Proceedings No. 4147, Mis., dated 12th December 1913), and for Pollachi, Udamalpet and Kollegal on 20th October 1913 (Board's Proceedings No. 67, dated 10th March 1914).

VIII. *Financial results and incidence of resettlement.*—Neither a general reclassification of soils nor of irrigation sources was made and the resettlement generally speaking took the form

of an all-round percentage enhancement, the percentages being 15 for wet and 12½ for dry. The existing and enhanced rates of assessment are shown below :—

Wet.			Dry.

* Area negligible.

5. *Initial settlement.*—The initial settlement of 50 newly surveyed villages of Kollegal taluk, the unsettled ayan portion of Sathegal village of Kollegal taluk and of 93 villages or portions of villages in Coimbatore, Avanashi, Bhavani, and

Gobichettipalaiyam taluks was made in accordance with the rules in force for the conduct of original settlement except that the block system of soil classification was not used. The general principles underlying the resettlement of the district were however invariably adopted. Before settlement, the rates in some of the remote villages of Kollegal showed both high and low extremes, some villages having an average Re. 1, and others having lands assessed at 1½ annas per acre.

The talukwar average rates for newly settled villages lie between As. 10-6 and As. 13-6 per acre. The increases by settlement in Kollegal and the Talavadi firka were 10 and 4 per cent. respectively.

Increment remissions were granted to pattadars on whom the land revenue demand was increased by more than 25 per cent. and reached a total of Rs. 26,862, of which Rs. 22,773 were on account of newly settled villages in Coimbatore, Avanashi, Gobichettipalaiyam, Bhavani and Kollegal and Rs. 4,089 on account of abolition of composition under the Cauvery channels in Karūr and Amaravathi channels in Udamalpet and reclassification of irrigation sources under the Aliyar in Pollachi and the Komarapalaiyam channel in Udamalpet.

6. *Cost of resettlement and survey operations.*—The cost of these operations amounted to Rs. 9,50,106 as against a net increase in revenue of Rs. 3,51,319.
